AEserver AI Builder: Overview, plans and credits

AEserver AI Builder · https://www.aeserver.com/support/aeserver-ai-builder-overview/

AEserver AI Builder builds a website or a web app from a description in plain words. You describe what you want in a chat, the AI builds it, and you keep asking for changes until it is right. Hosting and SSL are included, so when you are happy you press Publish and it is live.

How it works

1. **Describe your website or app.** One or two sentences is enough to start, in any language.
2. **The AI builds a first version.** You watch it work in the chat and see the result in a live preview.
3. **Refine it by chatting.** Ask for changes the way you would ask a designer: new pages, different colours, your own text and photos. Small text and image changes can be made by clicking on the page itself.
4. **Publish.** Your site goes live on a free web address straight away. On Maker and Creator you can connect your own domain.

New to it? Getting started with AEserver AI Builder walks you through your first project.

What you can build

- Business websites, landing pages and portfolios
- Blogs and content sites
- Web apps such as booking systems, customer feedback tools, stock trackers and dashboards, with a database and sign-in for your users
- Prototypes to test an idea before you invest more

NoteAI Builder makes modern, fast-loading sites. It is not WordPress and does not run PHP, so it is not the right tool if you need WordPress plugins, a native mobile app or a large enterprise system. To

take payments, connect Stripe under **Settings > Integrations**: card details are handled by Stripe, not stored in your project.

Plans

Every plan includes one project, hosting and SSL. Paid plans can be billed yearly or monthly; yearly works out at two months free.

Plan	Credits	Price (excl. VAT)	Projects	Database	Your own domain
Free	500,000, to use within 30 days (one time)	Free, no card needed	1	1 GB	No
Maker	1,000,000 every month	AED 240 a year (USD 65), or AED 24 a month (USD 6.50)	1	5 GB	Yes
Creator	2,000,000 every month	AED 480 a year (USD 130), or AED 48 a month (USD 13)	1	5 GB	Yes

Prices exclude 5% UAE VAT, which is added at checkout. You can change plan at any time, and the new plan applies straight away. See Upgrade or change your AI Builder plan.

TipEach account can have one Free plan. Use it to try the builder with your own idea before you choose a paid plan.

What credits are

The AI uses credits each time it builds or changes something. Bigger changes use more; clicking on the page to edit text yourself uses none. Maker and Creator get fresh credits every month, and unused credits do not carry over. Read How AI Builder credits work to see your balance and make your credits go further.

What is included

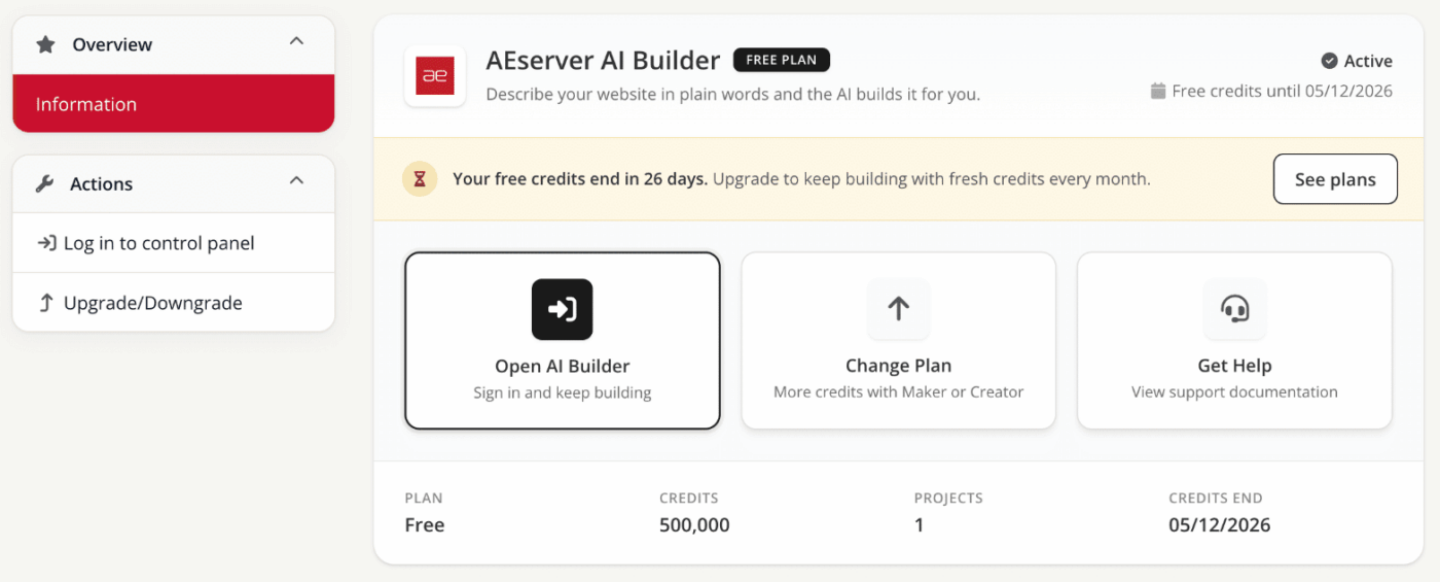

Included	Details
Hosting and SSL	Your site is served securely over HTTPS. There are no servers to manage.

Included	Details
Free web address	Every published site gets a free address you can share straight away.
Your own domain	Maker and Creator. See Publish your site and connect your own domain.
Database	Created for you when your project needs to store things, such as form entries or bookings. 1 GB on Free, 5 GB on Maker and Creator.
Choice of AI model	Pick which AI model builds your project, with models from OpenAI, Claude, Kimi and more.
Version history	Go back to an earlier version of your project at any time.
Integrations	Connect tools such as Stripe for payments, Google Analytics, Google Search Console, Meta Pixel and Mailchimp under Settings > Integrations.
Build by message	Connect WhatsApp or Telegram under Settings > Connections and build by sending messages. They work on the same projects you see in the builder.
SEO tools	Maker and Creator. Set page titles and descriptions and run the built-in SEO check.
Password protection	Maker and Creator. Put a password on your published site.
AI Builder badge	Sites published on the Free plan show a small AEserver AI Builder badge. Maker and Creator can hide it.
Where it is hosted	In the EU: published projects are served from Frankfurt, Germany, and databases run in Ireland.

NoteEmail is not included. For mailboxes at your own domain (such as info@yourcompany.ae), use a separate email service.

Managing your AI Builder

Everything about your plan lives in your AEserver client area at **my.aeserver.com**, under **My Products and Services**. The service page has three shortcuts: **Open AI Builder** signs you in to the builder, **Change Plan** shows the paid plans, and **Get Help** opens the AEserver support site.

Your AI Builder service page in the AEserver client area.

Try AEserver AI Builder free500,000 credits to try it with your own idea, no card needed. Start building.
