How to Disable Directory Browsing Using the htaccess Rule

htaccess Tutorials · https://www.aeserver.com/support/how-to-disable-directory-browsing-using-the-htaccess-rule/

For security purposes, you should disable directory browsing on your website so no one can see the files/directories of your website.

You can disable Directory Browsing by adding the below line to your dot htaccess file.

```
Options -Indexes
```
