How to Generate a Full Backup in Plesk

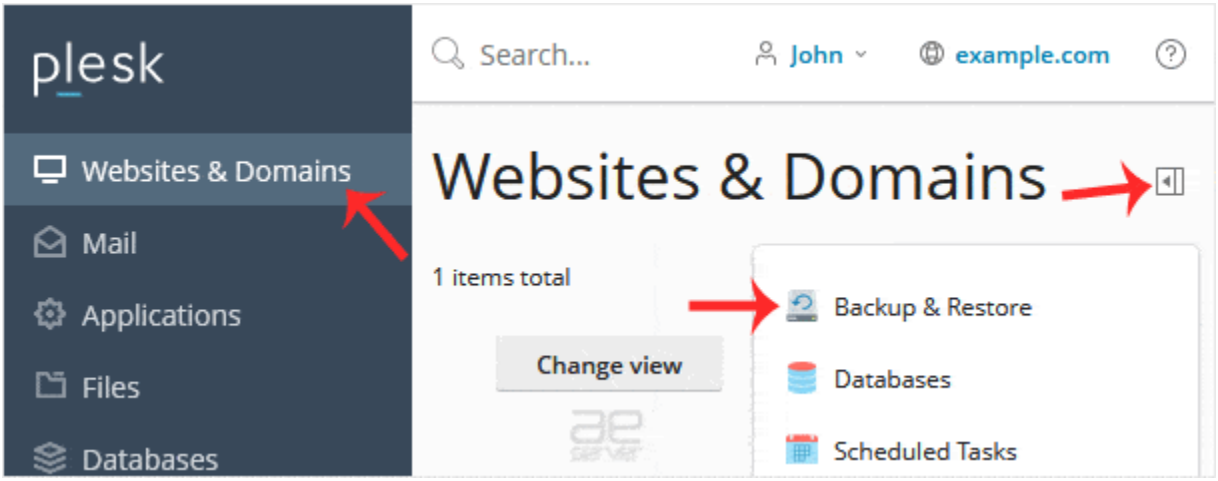

Plesk Control Panel · https://www.aeserver.com/support/how-to-generate-a-full-backup-in-plesk/

Backing up is important, and you should do it regularly. Follow this tutorial to make a full backup of your website with Plesk.

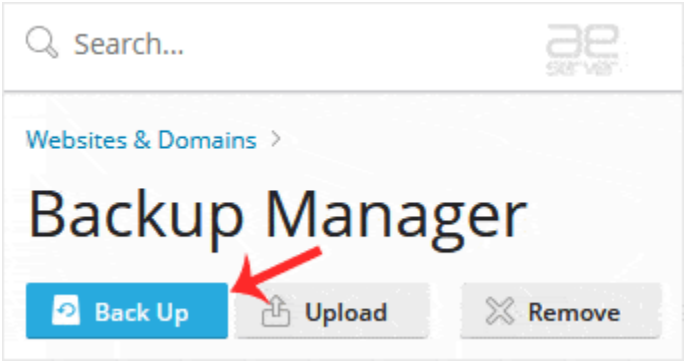

How to Generate a Backup of your Plesk Account?

1. Log in to your Plesk account.

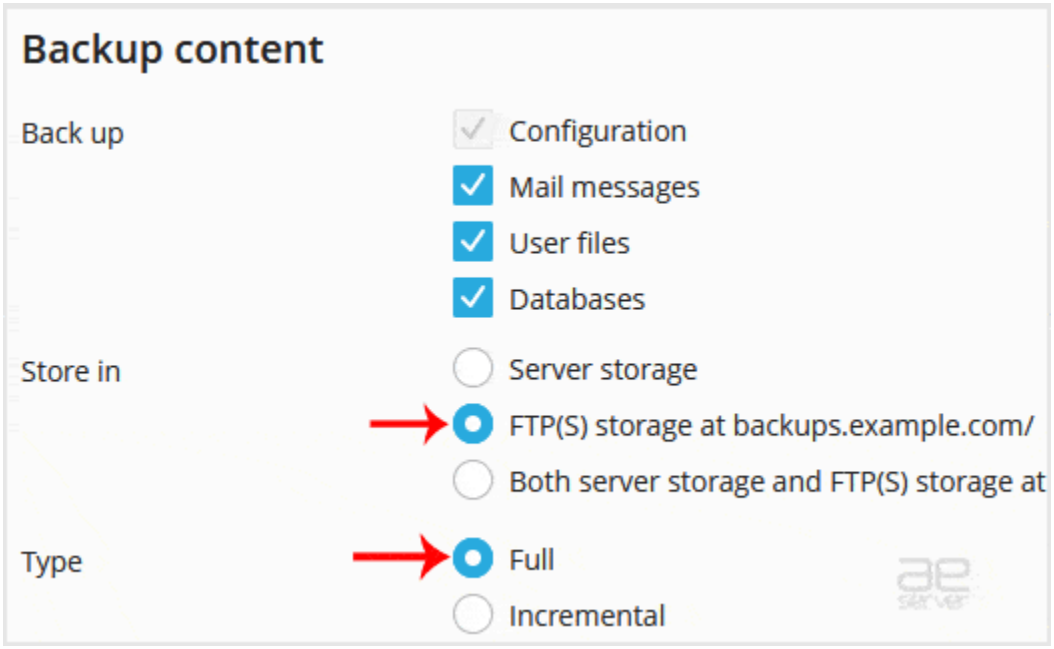

2. Go to **Websites & Domains** > Click on the **Pull icon** > Choose **Backup & Restore**.

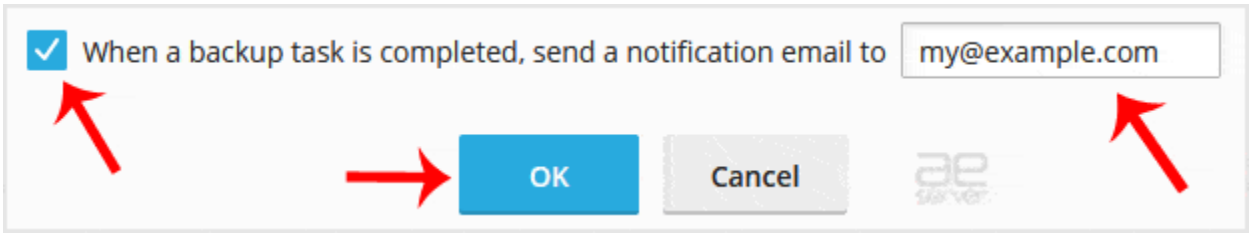

3. Under Backup Manager, click **Back Up**.

4. Choose **Full** as the backup type and FTP(s) in **Store in** option.

5. If you wish to receive a notification on backup completion, you can checkmark the "**When a backup task is completed, send a notification email to**" option.

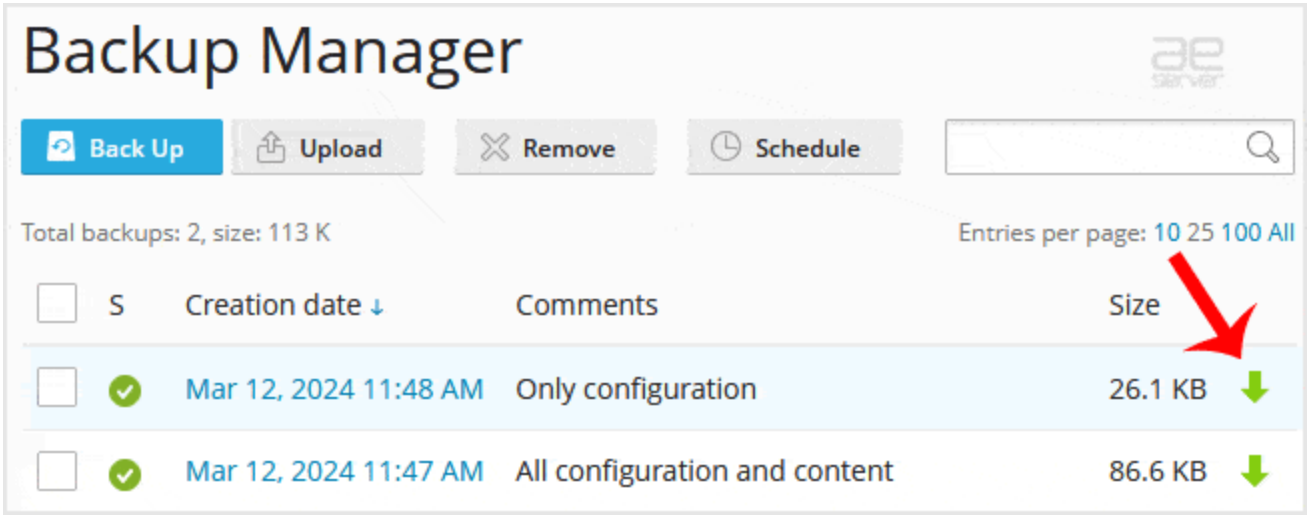

6. Confirm with **OK**. The backup will start generating in the background. At this point, you can navigate away.

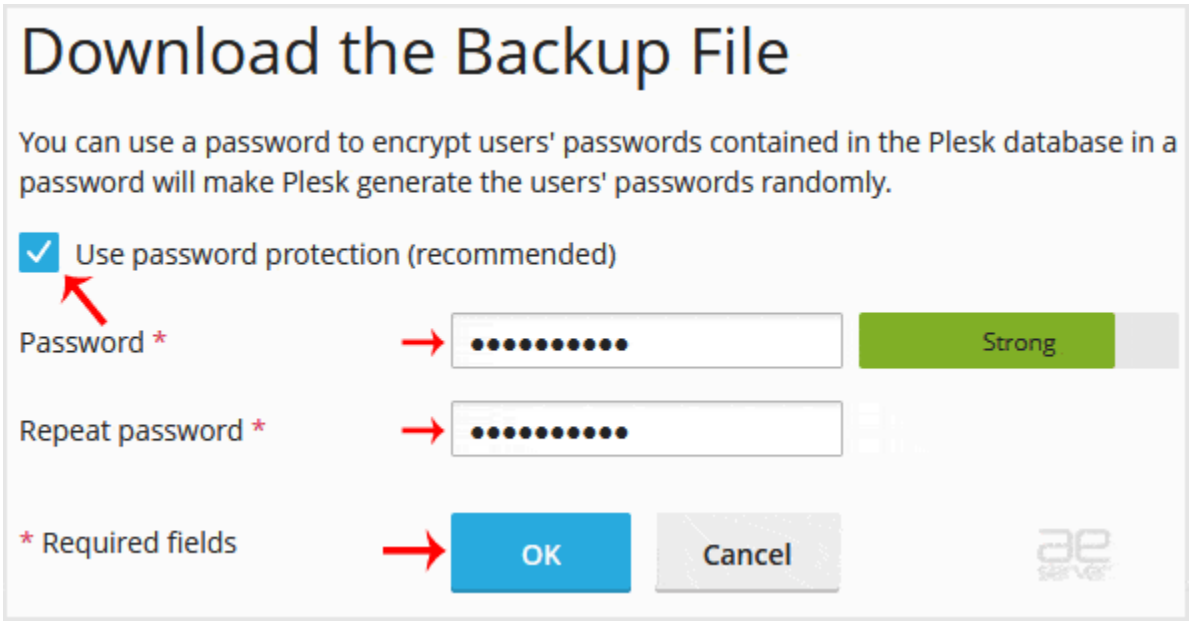

How to Download a Backup of Your Plesk Account?

1. Go to **Websites & Domains** > Click on the **Pull icon** > Choose **Backup & Restore**.

2. From the backup list, click the **download** icon.

3. If you want to password protect the backup file, checkmark **Use password protection** and enter a password. Then confirm with **OK**.

4. A download will prompt you. Please, save the backup to your computer.
