How to Install FluxBB Forum via Softaculous in cPanel

cPanel Control Panel · https://www.aeserver.com/support/how-to-install-fluxbb-forum-via-softaculous-in-cpanel/

Softaculous helps you install web applications very easy. Please, follow the steps below to install FluxBB Forum.

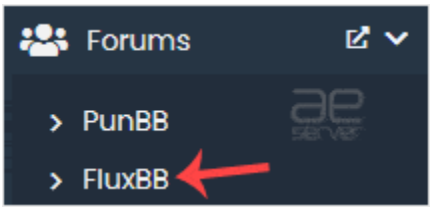

1. Log in to your cPanel account.

2. In the **Software** section, click on **Softaculous Apps Installer**.

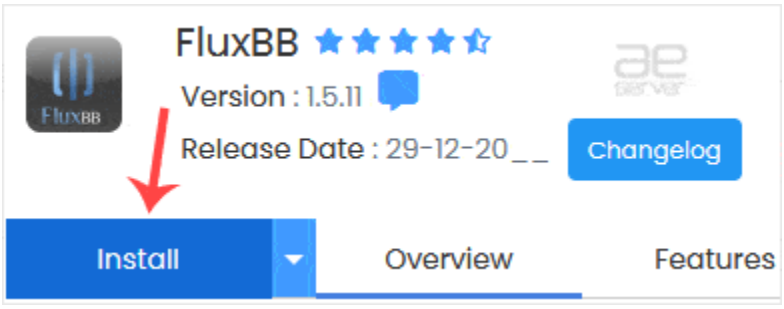

3. cPanel will redirect you to the Softaculous interface.

4. On the left side, locate the **Forums** category. Click on it and then on the **FluxBB** link that appears.

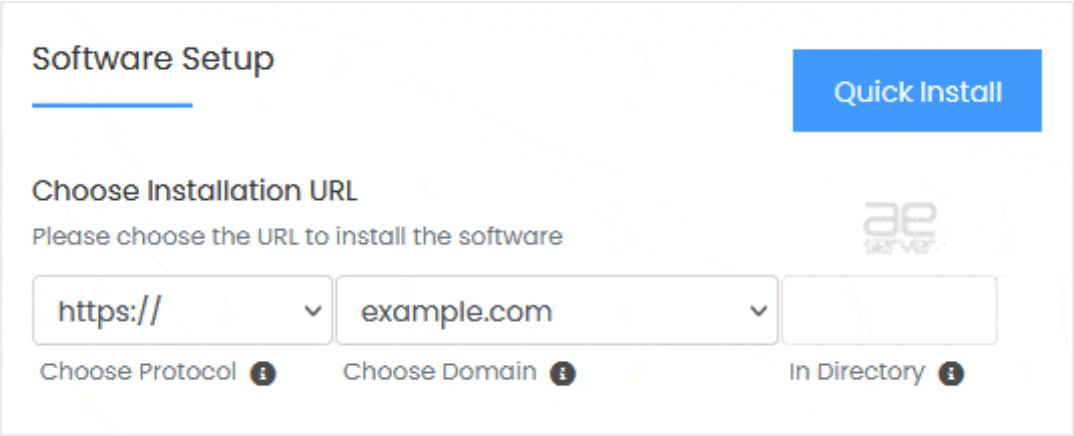

5. Click on **Install**.

6. Fill the necessary field, under the **Software Setup** field:

- **Choose Installation URL:** Choose the appropriate protocol/domain. Inside the "**In Directory**" field, should you want to install this in a directory, i.e., example.com/directory, enter the directory name. Otherwise, please, leave it blank to install in your main domain, i.e., example.com.

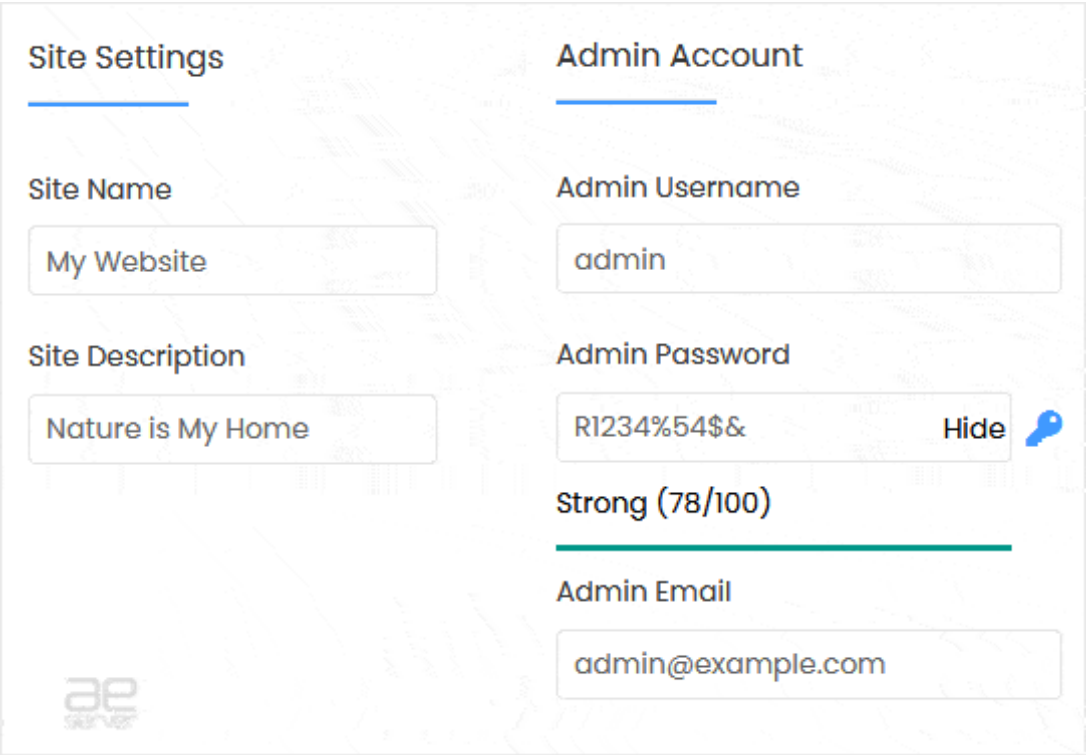

7. Enter the following details under the **Site Settings** field:

- **Site Name:** Name of your Forum, such as Technology Forum.
- **Site Description:** Your site description.

8. Under the **Admin Account** field, enter the following information:

- **Admin Username:** Your new FluxBB username (for security reasons, do not use the **administrator** or the **admin** username).
- **Admin Password:** Use a strong password.
- **Admin Email:** Your email address. It is helpful for admin account password reset, notification, etc.

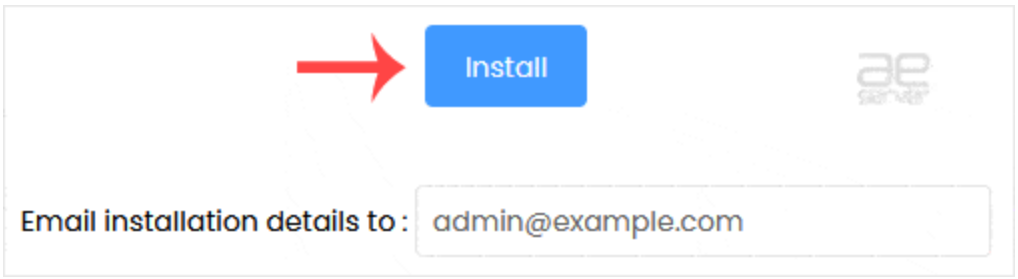

Note: Copy the admin username and password to Notepad. You will need those to access the admin area of your FluxBB forum later.

9. Choose Language: You can choose the language of your FluxBB forum. The default language of FluxBB is English.

10. Advanced Options: Leave this unless you want to change the database name or take an automated backup. Please, note that creating frequent backups may take a lot of disk space.

Finally, scroll down to the end of the page and click on Install.
