How to Install GRAV via Softaculous in cPanel

cPanel Control Panel · https://www.aeserver.com/support/how-to-install-grav-via-softaculous-in-cpanel/

Softaculous helps you install web applications very easy. Please, follow the steps below to install GRAV.

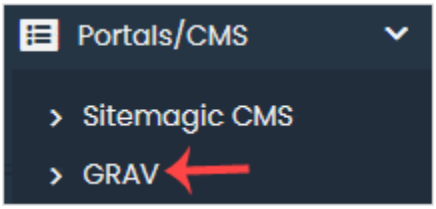

1. Log in to your cPanel account.

2. In the **Software** section, click on **Softaculous Apps Installer**.

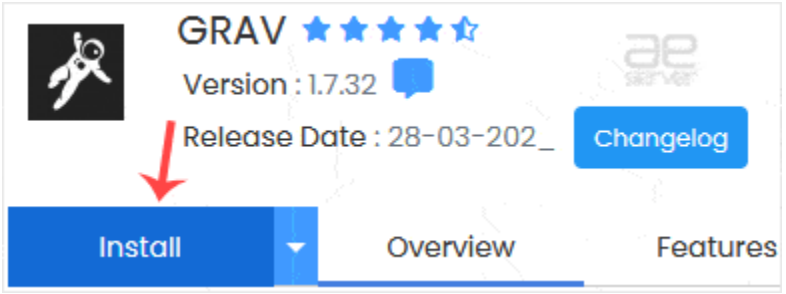

3. cPanel will redirect you to the Softaculous interface.

4. On the left side, locate the **Portal/CMS** category. Click on it and then on the **GRAV** link that appears.

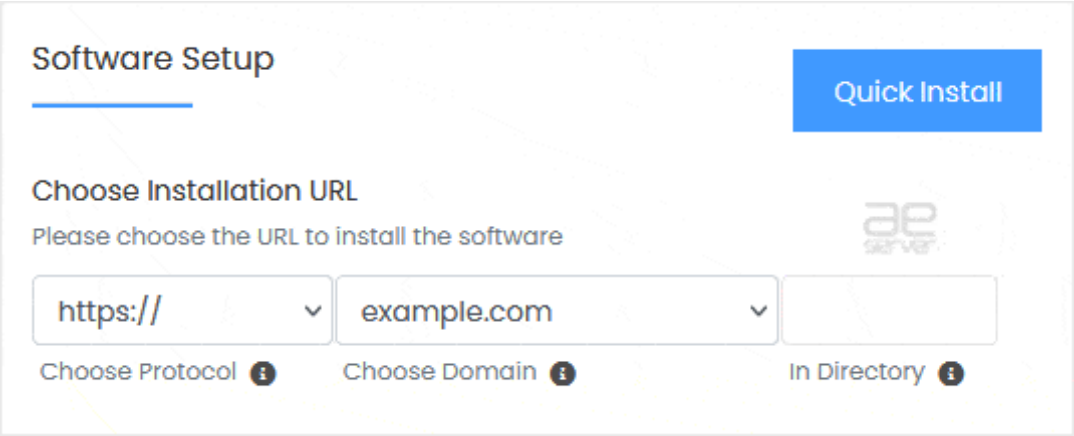

5. Click on **Install**.

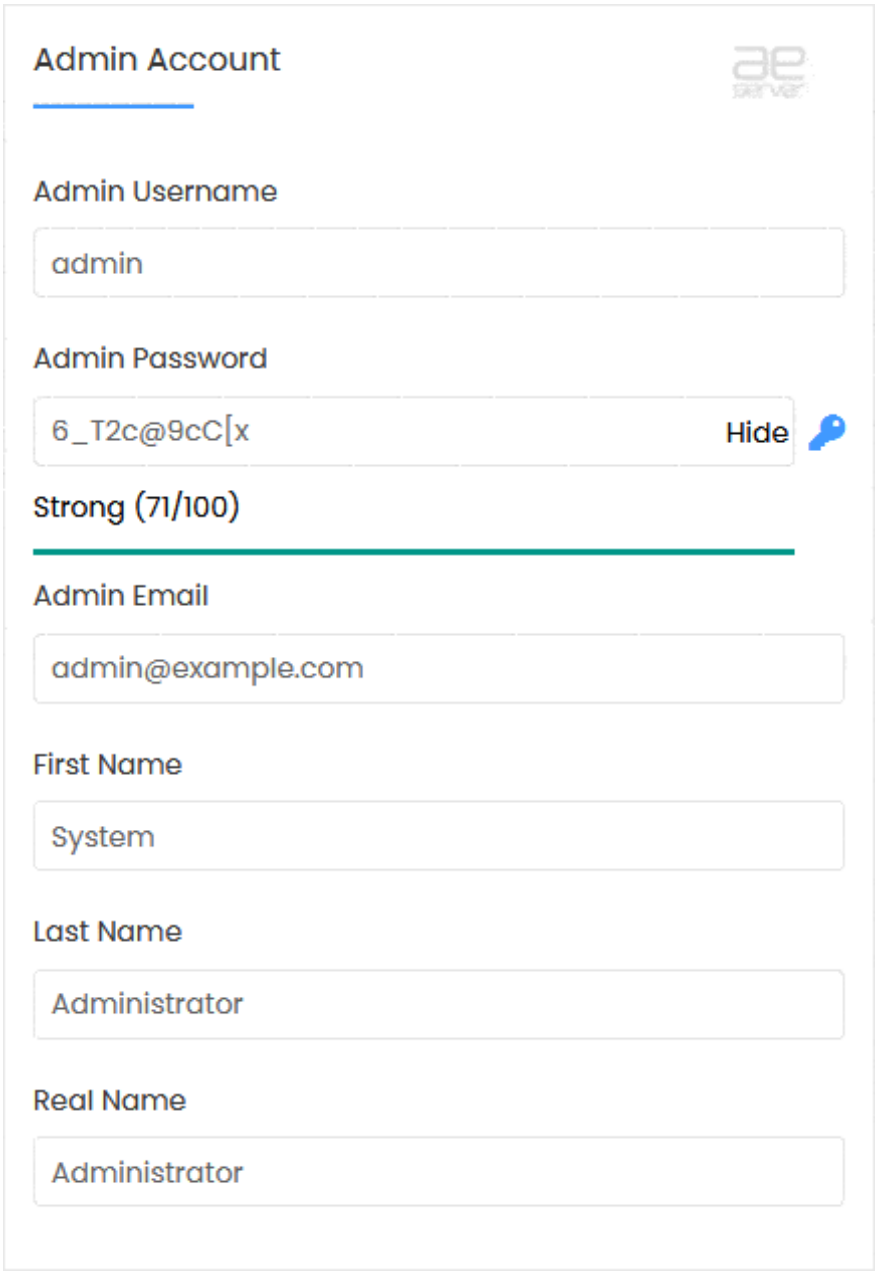

6. Fill in the necessary fields under the **Software Setup** fields:

- **Choose Installation URL:** Choose the appropriate protocol/domain. Inside the "**In Directory**" field, should you want to install this in a directory, i.e., example.com/directory, enter the directory name. Otherwise, please, leave it blank to install in your main domain, i.e., example.com.

7. Under the **Admin Account** field, enter the following information:

- **Admin Username:** Your new GRAV username (for security reasons, do not use the **administrator** or the **admin** username).
- **Admin Password:** Use a strong password.
- **Admin Email:** Your e-mail address.
- **First Name:** Enter your first name
- **Last Name:** Enter your last name.
- **Real Name:** Leave this as it is or use your full name.

Note: Copy the admin username and password to Notepad. You will need those to access the admin area of your GRAV website later.

8. Advanced Options: Leave this unless you want to change the database name or take an automated backup. Please, note that creating frequent backups may take a lot of disk space.

Finally, scroll down to the end of the page and click on Install.
