How to Update the DNS Nameservers at DynaDot

Domains & DNS · https://www.aeserver.com/support/how-to-update-the-dns-nameservers-at-dynadot/

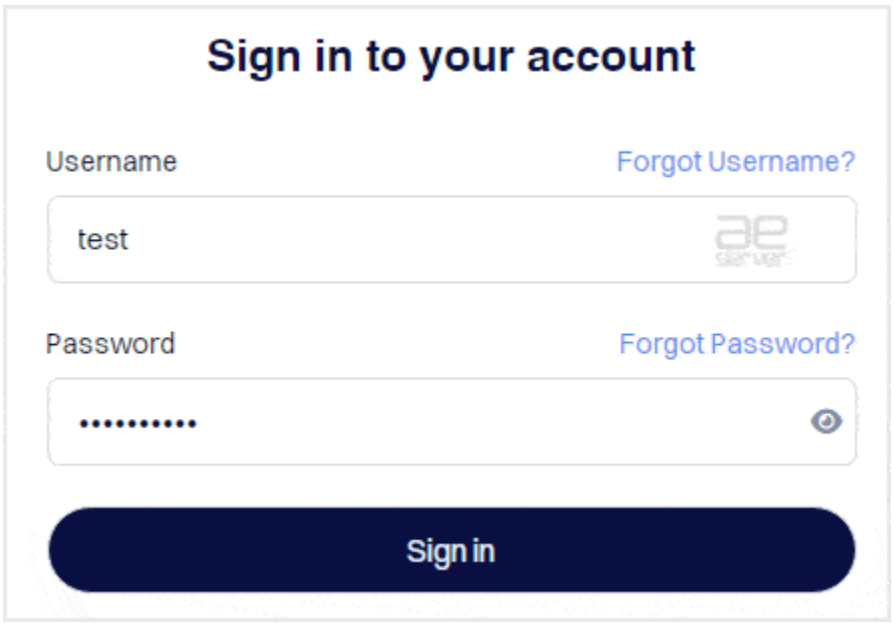

You can find our nameservers in your hosting welcome email. You need to update your domain nameservers to our nameservers.

If your domain is registered on **DynaDot**, you should follow this tutorial to update your domain's Nameservers.

1. Open the DynaDot website and click on **Login**. It will redirect you to a login page.

2. Enter the username and password of your DynaDot account and then click on **Sign-in**

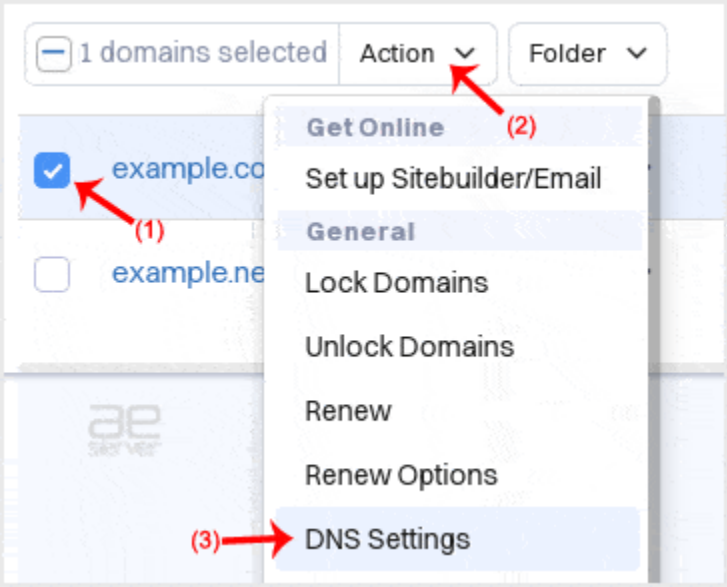

.

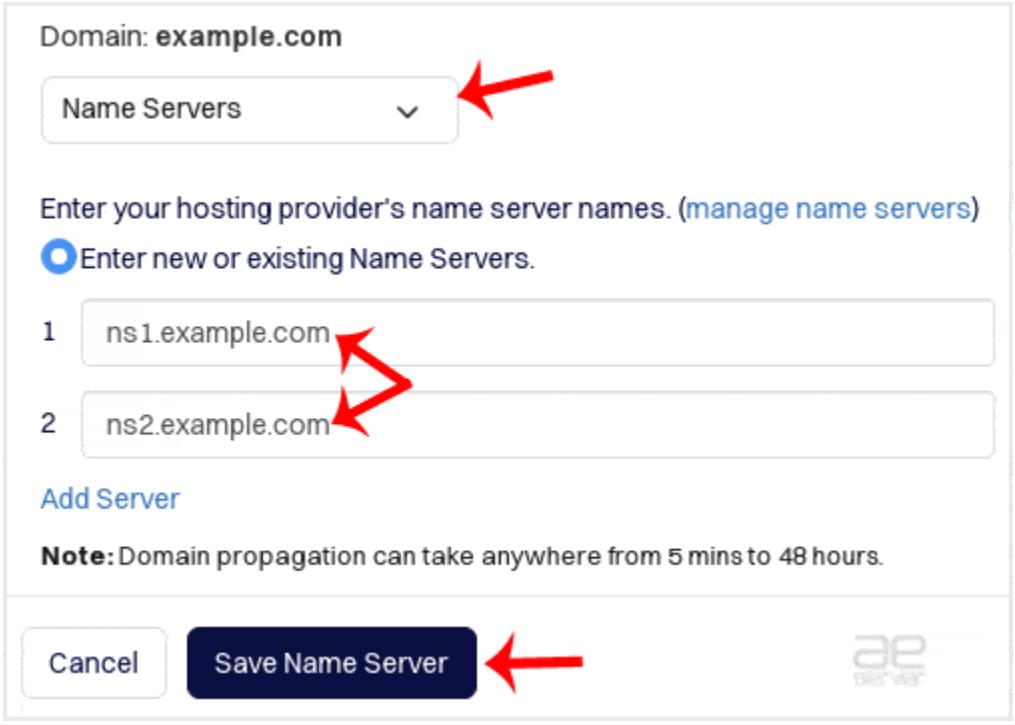

3. Click on **My Domains** from the left-side menu, then select **Manage Domains** in the drop-down.

4. Check the box next to your domain name(s) and click on the **DNS Settings** from the **Action** menu.

5. Select the **Name Servers** option from the drop-down menu.

6. Enter your nameservers in the provided text boxes and click **Save Name Server** to save your changes.

Check your Hosting Welcome Email to find your current nameservers. If you cannot find it, please do not hesitate to contact us for assistance.

Please note: DNS propagation can take 12-24 hours to take effect globally.
